

Sextupole

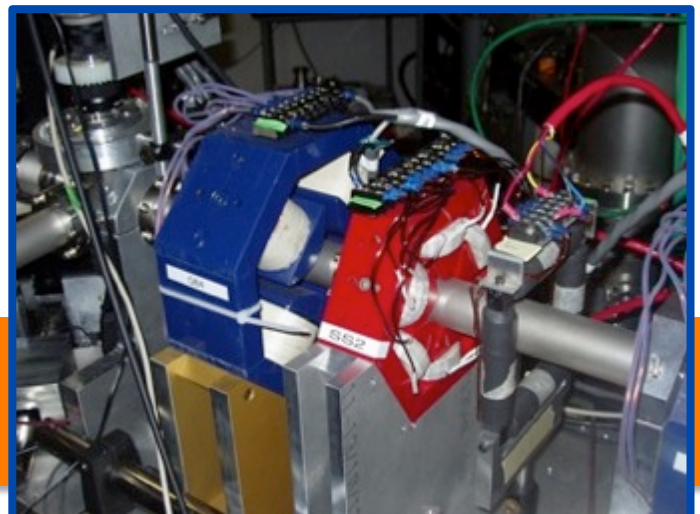

Features:

- Air-cooled
- Made on-site
- Nickel-plated steel poles

Dimensions of model shown:

Width	14 cm
Height	14 cm
Length	5 cm
Bore	4 cm
Mag. Strength	44 T/m ² A

Sextupoles are finding more frequent application in high brightness beamlines to correct chromatic aberrations and to linearize dispersive transport lines. These magnets, based on proven designs, demand tight machining tolerances, but produce superior field profiles.

Other options are available upon request.
