

Water-Cooled Magnets

For increased magnetic strength or large bores, RadiBeam Technologies offers water-cooled magnets of all types.

Our coils are taped, wound, potted, and extensively tested in-house for the utmost quality control. After individual coil testing, each magnet is individually terminated and performance is checked against design specifications and put under load to ensure reliability.

FEATURES

- Nickel-plated steel poles
- Compression or flared water fittings
- Seamless epoxied coils
- Direct or indirect cooling
- Over-temperature switches
